FOR IMMEDIATE RELEASE

X9Ware LLC Releases X9Assist R2.05 With Support for the Canadian CCD

ST. LOUIS, Missouri (May 30, 2013) - X9Ware LLC announces the availability of *X9Assist* R2.05 now including many new valuable validation and usability improvements to its' flagship product. *X9Assist* is a full function tool for organizations involved with check image processing both in the United States and Canada. *X9Assist* contains support for the industry standard ANSI X9.37 and X9.100-187 specifications and variants including the UCD, CCD, and East Caribbean ACH formats.

This latest release, R2.05, adds both validation and test data generation support for the Canadian Companion Document (CCD), which is an x9.100-187 variant. This support includes the CCD for Direct Clearer image exchange and CRD/RRD print file specifications. CCD support is compliant with the current "CPA Standard 015" level; any revisions will be quickly implemented as they are published and approved.

A major US Bank has thoroughly evaluated *X9Assist* because of the recent inclusion of the CCD variant.

R2.05 includes a substantial list of improvements. *Modify* is now implemented at the record (not field) level, which is very useful when you want to change multiple fields within the same x9 record. The *Check Viewer* has been enhanced to allow you to optionally include a new x9 field viewer panel. This allows you to easily view the image and x9 fields concurrently on the same screen. The field viewer can be toggled on and off and this setting is remembered from session to session.

A complete list of enhancements included in R2.05 can be found at the X9Ware LLC website www.x9ware.com; go to Contact Us and Release History. When visiting the website, an evaluation copy with minimal limitations can be downloaded from the Downloads section. A full function version can be made available for an extended evaluation period. Please write to x9assist@x9ware.com.

About X9Ware LLC
X9Ware LLC (www.x9ware.com) provides extensive tools for users of the various x9.37 file specifications. The product line extends from a free x9 viewer to tools that include validate, modify, make, generate, scrub, import, export, and a host of other x9 support and reporting functions. X9Ware LLC strives to offer the best tools in the industry and also offers consulting services that are based on our 35 years of industry experience.
