

FOR IMMEDIATE RELEASE

X9Ware LLC Releases X9Assist R2.06 With Improved Export Support

ST. LOUIS, Missouri (June 28, 2013) - X9Ware LLC announces the availability of *X9Assist* R2.06 which includes significant enhancements and usability improvements. *X9Assist* is a full function tool for organizations involved with check image processing both in the United States and Canada. *X9Assist* contains support for the industry standard ANSI X9.37 and X9.100-187 specifications and variants including the UCD, CCD, and East Caribbean ACH formats.

This latest release, R2.06, enhances Export to allow multiple x9 files to be used as input when building a single CSV output file. Export allows you to identify the specific record types to be exported from a parsed x9 file. With this enhancement, for example, you can read dozens or even hundreds of x9 files and create a single CSV that contains the file header and type 25 records across all of the selected x9 input files. This provides significant productivity improvements for users who routinely need to locate data across a large number of files.

R2.06 contains various additional enhancements including a new Repackage tool that can be used to rebundle and optionally reorder records within ICL/ICLR files, the ability to save and reuse Scrub configurations, an enhanced Check Viewer that shows the full MICR line from the item record, automated repair of 61 credit amounts, and Make/Generate usability improvements including support for make/generate reformatter pairs.

A complete list of enhancements included in R2.06 can be found at the X9Ware LLC website www.x9ware.com; go to Contact Us and then Release History. An evaluation copy of X9Assist can be downloaded from our website (visit our Download section). A full function version can be made available for an extended evaluation period upon request. Please write to x9assist@x9ware.com.

About X9Ware LLC

X9Ware LLC (www.x9ware.com) provides extensive tools for users of the various x9.37 file specifications. The product line extends from a free x9 viewer to tools that include validate, modify, make, generate, scrub, import, export, and a host of other x9 support and reporting functions. X9Ware LLC strives to offer the best tools in the industry and also offers consulting services that are based on our 35 years of industry experience.
