

FOR IMMEDIATE RELEASE

X9Ware LLC Releases X9Assist R2.08 With Extended X9 Record Support

ST. LOUIS, Missouri (September 26, 2013) - X9Ware LLC announces the availability of X9Assist R2.08 which has been updated for the final version of the Canadian Companion Document (CCD) Standard 015 as published in August 2013. This new release includes additional enhancements to our Make/Generate process and improved x9 record type support.

Make/Generate includes several significant improvements. Images can now be optionally created at either 200 or 240 DPI. New parameters allow entry of a sequential date range that controls the date written, which appears on the front side of the virtual check image. Make has a substantial enhancement that allows the definition and creation of type 68 user records, using data fields that can be logically defined within your Use Case file. Scrub can now assign sanitized dates in a manner that is similar to Make/Generate.

Preliminary support has been added for the upcoming type 62 credit record. The release includes new x9 rules that allow credits to be optionally added into either the item count or amount totals in the bundle, cash letter, and file control trailer records. Support has been added for the variable length type 27/34 addendum records. This includes the ability to create those variable length records using the Make facility.

This latest release includes several usability improvements. The Modify/Delete function has been enhanced to allow either all "good" or all "error" items to be easily removed from an x9 file. New messaging clearly identifies those x9 record fields that are incorrectly populated as numeric-blank when they should instead be numeric-only, per x9 specifications. All help files have been converted to HTML which provides an enhanced user interface. Program startup times have been reduced and error recovery procedures have been enhanced.

A complete list of enhancements included in R2.08 can be found at the X9Ware LLC website www.x9ware.com; go to Contact Us and then Release History. An evaluation copy of X9Assist can be downloaded from our website (visit our Download section). A full function version can be made available for an extended evaluation period upon request. Please write to x9assist@x9ware.com.

About X9Ware LLC

X9Ware LLC (www.x9ware.com) provides extensive tools for users of the various x9.37 file specifications. The product line extends from a free x9 viewer to tools that include validate, modify, make, generate, scrub, import, export, and a host of other x9 support and reporting functions. X9Ware LLC strives to offer the best tools in the industry and also offers consulting services that are based on our 35 years of industry experience.
